## Características de las pruebas

There will be a written test (reading and writing skills) and a short oral test (listening and speaking skills)

The **written test** (80%) will include:

- Exercises of reading comprehension and vocabulary in which you have to match both parts of a definition and then associate the definition to one of the words supplied.
- Exercises of written expression in which you have to name design elements or concepts that are present in an image and explain what they are in a few words.
- Analyze logos naming the basic principles that guided their design and why the colors used in them are appropriate for that kind of brand.
- Identify icons from the toolbar of the Adobe programs and explain their functions.
- Use the vocabulary of the area to correct design mistakes that will be shown in a series of pictures.

The **oral test** (20%) will include:

- Express agreement and disagreement with statements from the teacher that will be related to some of these topics:
  - Printed media vs. digital media
  - Apple computers vs. PC in graphic work
  - Minimalism vs. ornamentation
  - Working freelance vs. working for a company

The students will be expected to introduce arguments of their own and be able to debate for a few minutes.
